

Termite Mound Ornament

Next Best Thing to Nature...

#46634

This natural looking termite mound ornament provides an elevated basking point for reptiles to get closer to the heat source such as the Reptile One heat lamps or Reptile One fan heaters. This allows greater flexibility to create a natural environment in your vivarium.

Suitable for: Most desert or savannah dwelling Goannas, Dragons and Lizards

#46635

Features & Benefits

- Available in two different sizes
- Realistic shape and texture
- Made of tough, strong resin
- Provides an elevated basking point
- Creates a natural desert scape in your vivarium

Product Price

Item Code	Description	Colour	Dimensions	R.R.P
46634	Termite Mound Small	Red Earth Brown	19 W x 18.5 D x 26.3 cm H	\$38.00
46635	Termite Mound Large	Red Earth Brown	24.2 W x 18.2 D x 34 cm H	\$48.00

Notes, Hints & Tips

1. Place this ornament directly underneath the heat source such as Reptile One's Low Voltage fan heater or conventional heat lamp to allow reptiles to bask for heat.
2. Be aware that due to the elevated height of the mound, your reptile may be able to jump and reach the roof of your vivarium so make sure your vivarium is secure and your reptile cannot escape through the roof.

Warnings & Disclaimers:

- DO NOT place a heat source such as a heat mat inside or directly under the termite mound.
- It is recommended that you remove all substrate from under the mound so that the mound sits directly on the bottom panel of your vivarium, then place your substrate back and around the termite mound.
- Ensure that you place the mound on a flat surface so that it sits flat on the surface to prevent the mound from tipping over.
